

## Münch Chemie: Your specialist for release agents and processing aids

For over 70 years Münch Chemie International GmbH represents specialisation and broad know-how in release agent and auxiliary material solutions.

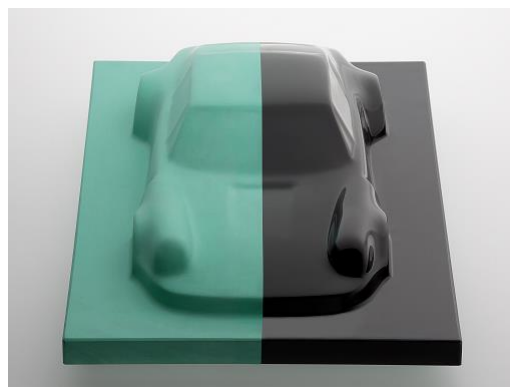

The continuous adaptation of our product portfolio to the ever-increasing market requirements is part of our company philosophy, with the aim of achieving the highest customer satisfaction.

In addition to a broad core product range we also offer innovative, customised solutions tailored to your individual requirements.

### Sealers from the Mikon® 39x MC series (Mikon® 397 MC, Mikon® 398 MC, Mikon® 399 MC)

Best quality and high process reliability in model and mould construction are guaranteed by our innovative sealers from the Mikon® 39x MC series, which can be used for a variety of porous surfaces, especially block materials, MDF, plastic and metal moulds:

- Low material consumption
- Minimal effort (ready-to-use product; max. 2-3 coating layers; fast drying/curing time; no laborious after-treatment required after application of sealer)
- Both colourless and coloured mould sealer available
- High resistance against increased temperature and chemicals
- Significantly improved process reliability
- Enhanced overall quality of moulded parts
- Excellent value for money
- Increased overall efficiency
